

My undergraduate research at DGIST focused on computer vision, particularly medical image segmentation and preference optimization (PO), under the supervision of [Dr. Soopil Kim](#). I am currently pursuing an M.Sc. in Culture Technology at KAIST under the supervision of [Prof. Sunghoon Im](#), where my research focuses on physical AI, vision-based robotics, and reinforcement learning (RL).

CONTACT INFORMATION **KAIST, Robotics and Vision Lab (RV Lab)** E-mail: jangjiwon@kaist.ac.kr Tel: +82 10-2243-9393
N5, 291 Daehak-ro, Yuseong-gu, Daejeon 34141, Korea Links: [LinkedIn](#) | [GitHub](#) | [Homepage](#)

RESEARCH INTERESTS **Natural Language Processing** (Retriever-Augmented Generation)
Computer Vision (Segmentation, Medical Imaging)
Robotics (Vision-Language-Action, Reinforcement Learning, Diffusion Policy)

EDUCATION **Korea Advanced Institute of Science and Technology (KAIST)** Daejeon, Korea
M.Sc. in Culture Technology, Robotics and Vision Lab (RV Lab) Sep 2026 – Present
Exchange Student, Mad Camp Jun 2024 – Jul 2024

Daegu Gyeongbuk Institute of Science and Technology (DGIST) Daegu, Korea
B.S. in Computer Science Feb 2022 – Feb 2026
Minor in Electrical and Electronics Engineering Feb 2025 – Feb 2026

WORK EXPERIENCE **UNIVA** Daegu, Korea
AI Research Intern Jun 2025 – Aug 2025
– Research and Development on Retrieval-Augmented Generation (RAG) for Large Language Models (LLMs).
– Development of Model Context Protocol (MCP) Servers for Tool-Augmented LLM Applications.

PROJECTS **Vision-Language Navigation for Factory Environments** Apr 2025 – Present
MSIT National R&D Project (ETRI, KETI, KAIST)
– On-Device VLM and Real-Time Mobile Intelligence Technology for Mission Execution of Autonomous Mobile Agents.

PUBLICATIONS [C1] Soopil Kim*, Dongmin Lee*, **Jiwon Jang**, Wafa Aarsalane, Daekyung Kim, Junhyeok Lee, KyoungJoon Lee, Sang Hyun Park. Multi-View Consistency-Based Adaptation of SAM2 for 3D ABUS Tumor Segmentation. **MICCAI**, 2026. **Early Accept** (Top 9%), **Oral Presentation**. [\[Paper\]](#)

[S2] Yunseong Nam, **Jiwon Jang**, Dongkyu Won, Sang Hyun Park, Soopil Kim. Model Agnostic Preference Optimization for Medical Image Segmentation. *arXiv:2512.15009*; **ICLR**, 2027 (under review). [\[Paper\]](#)
[C] Conference Accepted, [S] Submitted. * Co-first author.

AWARDS & ACHIEVEMENTS **Encouragement Award, DGIST Undergraduate Group Research Program** Feb 2024
– Exploring Emotions Through Art for Psychotherapy: Building an Emotion-Sketch Dataset and a PEFT-Based AI Approach.

TEACHING **DGIST Undergrad**
Teaching Assistant, Machine Learning (50+ students) Feb 2026 – Jun 2026
Teaching Assistant, Object-Oriented Programming (100+ students) Aug 2024 – Dec 2024

SKILLS

- **Languages:** C/C++, Python
- **Technologies:** PyTorch, Git, ROS2, $\text{\LaTeX}$
- **Methodologies:** Segmentation [C1, S2], Medical Imaging [C1, S2], Robotics, Vision-Language-Action/Navigation (VLA/VLN), Reinforcement Learning [S2], Diffusion (Policy) [S1]
- **Embodiments:** Quadruped Robot (Unitree GO2), Mobile Robot (AgileX Ranger)
